

Agentic Business Transformation with Microsoft Copilot Studio, Azure AI Foundry, and Power Automate

Move Beyond AI Pilots. Build Agentic Systems That Deliver Measurable Business Outcomes.

Most enterprises have already experimented with AI. They have pilots, proofs of concept, and isolated automation initiatives. What they often do not have is a repeatable model for turning those experiments into operational business value.

Prolifics Agentic Business Transformation (ABT) provides that model.

Built on Microsoft Copilot Studio, Azure AI Foundry, and Power Automate, ABT helps organizations identify the highest-value opportunities for agentic systems, rapidly prove business impact, and scale transformation incrementally across the enterprise.

From workflow discovery to production deployment, Prolifics delivers complete agentic systems that combine AI intelligence, automation, integrations, and user experiences into a governed enterprise platform.

What the Solution Does

Using a structured five-stage transformation methodology, Prolifics helps organizations:

- ✓ Identify business personas and workflow bottlenecks.
- ✓ Prioritize high-impact AI and automation opportunities.
- ✓ Design enterprise-ready agentic systems.
- ✓ Deliver measurable business outcomes in weeks.
- ✓ Expand successful implementations across the organization.

The result is a scalable transformation model where agents, workflows, enterprise data, and human decision-making work together as a unified operational system.

Built on Microsoft AI & Automation Technologies

This offering is powered by:

Microsoft Copilot Studio

Azure AI Foundry

Power Automate

Microsoft Azure

All AI processing is performed using private Azure OpenAI services. **Customer data is never used to train models.**

Estimated Engagement Starting at \$30,000

Scope Includes:

- ✓ Business persona and workflow discovery sessions.
- ✓ Identification and prioritization of AI opportunities.
- ✓ Agentic system architecture and governance design.
- ✓ Proof-of-value implementation for a selected workflow.
- ✓ Integration planning across enterprise systems and data sources.
- ✓ Incremental delivery roadmap and scalability recommendations.
- ✓ Documentation, governance, and knowledge transfer.

What You Receive

Gain a structured roadmap for enterprise AI transformation with measurable outcomes at every stage. Each deliverable is designed to accelerate adoption, reduce risk, and build long-term operational value.

Deliverable	Business Value
Business Persona & Workflow Map	Understand where operational friction and value creation exist
Prioritized AI Opportunity Map	Identify the highest-impact areas for AI investment
Agentic System Design	Define agents, integrations, workflows, governance, and experiences
Proof-of-Value Increment	Validate measurable business outcomes quickly
Incremental Delivery Roadmap	Scale transformation in manageable, value-driven phases

The Five Stages of Agentic Business Transformation

Clarity

Map business personas, workflows, decisions, and operational friction before introducing solutions.

Focus

Prioritize the workflows where agentic systems can create measurable value fastest.

Readiness

Design enterprise-grade agentic systems using Azure AI Foundry, Power Automate, and Copilot Studio.

Value

Deliver measurable outcomes through rapid, incremental implementations.

Momentum

Expand successful systems progressively across teams, workflows, and business functions.

Business Outcomes

Accelerate AI ROI

Deliver measurable business value from the first implementation increment.

Transform Manual Operations

Reduce repetitive, manually-intensive work through intelligent automation and orchestration.

Improve Decision Velocity

Enable faster, more informed decisions through AI-assisted workflows and enterprise grounding.

Reduce Transformation Risk

Adopt AI incrementally instead of relying on large-scale, high-risk modernization programs.

Build Sustainable AI Capability

Retain ownership of your agents, workflows, integrations, and operational knowledge.

Why Prolifics

Enterprise Delivery Expertise

Prolifics combines AI strategy with real-world engineering and production delivery experience.

Proven Agentic Systems

Our teams have deployed enterprise-grade agentic solutions integrating AI, workflows, data, and user experiences.

Designed for Client Ownership

Every solution is documented, governed, and transferred for independent long-term operation.

Faster Time to Value

Incremental delivery models enable organizations to realize ROI in weeks, not years.

The Strategic Next Step

ABT engagements begin with a structured assessment focused on Clarity and Focus; identifying the workflows, personas, and opportunities where agentic systems can deliver the greatest impact first.

From there, organizations scale incrementally through measurable delivery phases, allowing each successful implementation to accelerate the next.

Start small. Prove value quickly. Expand with confidence.

Offering Details

A flexible engagement model designed to help organizations adopt agentic AI capabilities incrementally, with measurable business outcomes at every stage. Built on Microsoft AI technologies and tailored for scalable enterprise transformation.

Field	Value
Marketplace Category	AI + Machine Learning
Primary Product	Microsoft Azure
Applicable Products	Microsoft Copilot Studio, Azure AI Foundry, Power Automate
Industry	Professional Services
Pricing Model	Estimated Project Pricing
Estimated Starting Price	From \$30,000 USD
Availability	United States, Canada, United Kingdom, India
